OCEANREEF®
underwater, naturally.
diving | 2022
WE WERE ALL BORN FROM THE SEA. Maybe that’s why we’re so irresistibly attracted to it.

As soon as we’re immersed in it, once again we turn to breathe, we feel we’re back to our true natural setting. In our every effort, every thought, every dream, the sea finds its way. We yearn to be back in it to better observe it, to admire its grandness, always with new eyes.

To be back in it, to be astonished by it and to share its wonders with our friends. To be back in it to imbue new life to the very place that’s been witness to the birth of it all.

* 

OCEANREEF®
underwater, naturally.

NEMO’S GARDEN .................................................51
ORIGINS OF SCUBA DIVING

The *Gamberini Family*, at that time, owned a small tire repair shop in the heart of Genova. Like many stories of success, hard work is supported by passion. It is passion that drove Giorgio and Ruggero Gamberini. Passion that animated their experiments with rubber that ended up attracting the attention of a mythical person at the time: Commander Ferraro – The Professor – who’s story would deserve a book on its own thanks to his military scuba endeavours during the war. He became one of very few, living, recipients of the Military Gold Medal – highest recognition of the Italian Navy.

Ferraro was in the middle of designing his first rubber masks and fins for scuba diving and swimming when he reached out to the Gamberini brothers because of their expertise with this new material. Shortly after, the two brothers (with the addition of the third brother – Gianni), were contacted by Egidio and Nanni Cressi, as they, too, were caught up in designing their first products to open up the underwater world to the masses.

From these first steps the Cressi brothers founded modern Cressi-Sub and Ferraro Pounded Technisub. These successful partnerships attracted a third famous personality: a young, Istrian refugee called Ludovico Mares, with whom, the Gamberini brothers would go on to found Mares. Brands that not only have made the history of scuba diving – they generated the scuba industry. The collaboration with these innovators is one of the reasons why the Gamberini’s have specialized in OEM production for rubber products for so long.

LUCKY MISTAKE

History of mankind is full of lucky findings and discoveries, one of the most famous ones is Alfred Nobel’s discovery of dynamite.

A much less gruesome story is that of how the Gamberini brothers ended up creating a wrong rubber mix in the late 1950s, creating the first ever floating rubber. Gianni Gamberini, disappointed and annoyed with the result of his experiment, threw a test mix to cool off in a water recipient. To his awe, the rubber piece, went right back to the surface and floated. Shortly after, the first Floating Fins were on the market. The first one to intelligently exploit this discovery was business-keen Cressi, who had great success with this line of products.
TALKING ABOUT DIVERSIFYING AND FLEXIBILITY
Since then the Gamberini family has always been working with rubber, plastics and its derivates, mastering this category of raw material and continually finding new potential uses and markets.
After the three brothers, came Giorgio’s sons: Guido and Sergio, whom, 30 years later found themselves producing Binda’s historical intuition. Binda – the famous co-owner of famous luxury watch brands. Guido and Sergio produced the first rubber straps for watches, characterized by bright colors and bold patterns, never before imagined – the HIP-HOP watch was born… then the first Swatches.
The watch expertise continued with important clients such as Hublot and Bulgari, with the key addition of Sergio’s son Massimo.
Meanwhile, other business opportunities arose. A big market was found in medical and work safety products. Famous products for NBC military and civil use were created.

BACK TO THE WATER
Sergio’s personal passion for water and the ocean, combined with the family’s rubber and plastic manufacturing DNA, along with his studies as a chemical engineer, created the ingredients from which the modern history – OCEAN REEF brand – was born.
In 1993, Sergio orchestrated the purchase of an American scuba manufacturing company based in San Diego – Ocean Edge.
Sergio’s intuition was to create a cross over from their gas mask design and expertise, back into the scuba industry, his First Full Face Mask for diving, a technical and innovative product that would guarantee a more comfortable, safe and relaxing uw experience.
From Reef-Marine and Ocean Edge, OCEAN REEF was incorporated. Since the Full Face mask had the advantage of a Free mouth – the subsequent step was to develop the underwater communication mask. OCEAN REEF is now one of the leaders in this market.

FROM THE DEPTHS TO THE SURFACE
Recent history of the group has been made by another outstanding partnership, with Sport Distribution leader and goliath, Decathlon.
With an excellent team work, a long and complex project was concluded with the birth of the First ever Full Face mask For Snorkeling use (FFSM). The famous and inexpensive Easybreath was born from this synergy. The success of this product literally revolutionized the snorkeling market – and is still shaking it –, years later.
After a long while, OCEAN REEF decided to design and patent a different level product in the same category, named Aria, it’s own FFSM – with a distinctive attention for quality, safety and design. A true Made in Italy product. The position of worldwide FFSM leader was then solidified with other big partnerships.

UNDERWATER GARDENING
In the meantime, another revolutionary idea “surfaced”. Italians, as we know, love talking about Food.
In 2012, Sergio was on vacation in his beloved Noli, a beautiful medieval town, just 60km from Genova, when, talking with a friend, the idea to grow plants underwater started to shape in his mind. This began an amazing project for underwater greenhouses and is still dropping jaws across the world today.

Nowadays the OCEAN REEF brand is committed to make the underwater world more favorable to mankind, by making it’s experiences easier. Our soul rests upon our American and Italian heritage.
This has always been our attitude.
This is what we believe in.
This is why our feet are well grounded and our mind is constantly Underwater, Naturally.
WHAT IS AN IDM (INTEGRATED DIVING MASK)

Our version of how a full face mask for scuba should be.

JAW FATIGUE
• Nothing to bite on.
• Frees mouth to communicate, drink.
• Enables nose breathing.

FOGGING
• No product treatment needed
• No fogging thanks to the air circulation system.

MASK PRESSURE EQUALIZATION
• Breathing apparatus integrated into the mask means automatic pressure equalization at each inspiration.

FLOODING
• Breathing inside the mask automatically purges water through the draining/exhalation valve if water were to be inside the mask for any reason. When voluntarily flooding the mask, a couple purges of the second stage button completely clear the water from the mask.

Natural Breathing
Through nose and mouth
FACE SEAL
• Patented bellows double “S”, “spring profile”, skirt.
• Larger sealing surface.
• More comfort thanks to the “floating effect” on the face.
• Available in 2 sizes.
• Seal capability derived from gas mask applications (CBRN tests) – the hardest test possible a face seal has to withstand.

FIELD OF VISION
• Larger field of vision than competitors (Italcert Certification PPE-05 Rif 1332/05).
• Visible light transfer of the visor is 92%, meaning a clearer view.
• Designed wider and sits closer to the face than other visors, giving a broader field of vision and less volume buoyancy.
• For visual comparison check page 10.

DURABILITY AND SCRATCH RESISTANCE
• Transparent polycarbonate visor made in Italy.
• Both sides are coated in siloxane resin for improved scratch and chemical resistance.
• Impact resistance tested by STANAG 4296 standards: impact of a steel ball travelling at 540 kph (335 mph).

HEAD HARNESS AND FAST ROTATING BUCKLE II
• Head harness attached to the face shield not on the skirt meaning no tearing and much better resistance to tugging.
• Six straps meaning no risk of losing reg if unconscious (much greater chance of surviving such an event) or violently hit.
• Wide strap tips for easy grasping.
• Fast rotating buckle system (different configurations per model) for comfortable and quick doffing and donning on the surface and secure, fast operations during underwater bail out or wearing.
• Neptune III now features first and only ever one-hand quick release system (QRS) doffing handle. Find out more on page 26.

3D EQUALIZATION SYSTEM
• Patented design.
• 3 way directional adjustment system: up/down, wide/narrow, close/far. Made for maximum comfort and nose breathing.
• Pushing the mask towards the face when needed causes the plugs to create a nasal seal.

AIR CIRCULATION
• Air circulation is achieved with an orinasal pocket so that CO2 build-up is not mixed with fresh air.
• One-way circulation keeps mask clear.

SURFACE AIR VALVE
• Easy to grab, sturdy design.
• Large air vents.
• Allows IDM divers to breath ambient air when at the surface, without having to take off the mask.
Evolved Innovation.
Badass Design.

DESIGNED BY DIVERS, FOR DIVERS.
COMFORTABLE - Premium materials, redesigned orinasal pocket resulting from the experience we have learned from more than 1 million of FFSM we have made for people around the globe.

RUGGED - Signature double coated visor is renowned for its unparalleled toughness and clearness, now combined with tech PU regulator protection and silicone deflector to absorb the shocks of intense scuba diving use.

EFFORTLESS - Completely new 2nd stage design and engineering. This FFM breathes smooth as silk.

BREATHES +33% - Vertical body, balanced – all new Neptune III regulator delivers amazingly smooth breathing at any depth. This IDM breathes +33% better than our Neptune Space. There is no bulk on your chin, exhaled bubbles in your eyesight or getting stuck while moving your head left and right.

FUNCTIONAL - This product can be used in almost any conditions, we built it that way. For example, the Neptune III is the first FFM that can be doffed with one hand.

INNOVATIVE - The 2nd stage is fully integrated into the mask, as per our company’s philosophy, but now it can be detached quickly (Level 1 tech certification required) for faster than ever servicing and swap. Find out more on page 50.

COMFORTABLE - Premium materials, redesigned orinasal pocket resulting from the experience we have learned from more than 1 million of FFSM we have made for people around the globe.
SAV III – while designing the IDM we decided to improve our professional surface air valve as well. Now with a new design, better grasping surface and an internal valve, the mask will not fog when not connected to the cylinder and water will not drip in if you leave the valve open when submerging your head.

PANORAMIC
We held the top spot for field of vision of any FFMs before the Neptune III, now we have increased it another 10%.

The Neptune III visor is all new and designed from scratch – it offers the widest field of vision of any conventional and any Full Face mask on the market. The Neptune III visor surpasses the Space’s field of vision by +10%. Using an uncommon vertical body regulator was a conscious design choice to push vertical vision to its maximum potential. Reading instrumentation and operating your equipment with a FFM has never been easier.

Approx size of the mask:
- 24 cm (9.44 inch) high
- 20 cm (7.87 inch) wide
- 20 cm (7.87 inch) deep

Weight of mask not in use (saltwater):
- 0.35 kg (0.77 lbs)

Buoyancy (in saltwater):
- 0.35 kg (0.77 lbs)

The physiological benefits of nose breathing are now getting more and more attention and that is one of the great “pros” of a Full Face Mask, but the Neptune III combines all the benefits, plus a dive/pre-dive switch, to make sure that you have all the control you want over your 2nd stage.
**NEPTUNE III PACKAGE**

Diving Full Face mask w/int 2nd st, surface air valve, hose, pressure gauge, octopus, SL35TX INT (or DIN) First stage + bump (back-up mask) + quick disconnect hose.

Free Annual Service and Maintenance for 4 years from the purchase date (Once per year at Facilities, shipping is not included.)

Free Upgrades for 2 years from the purchase date.

10% Discount on all accessories including Visor lights and Communication units. (Not valid for the purchase of another Full Face mask. Limit 1 accessory per mask purchased. Offer expires 1 year after the purchase date).
The Iron mask is a Chem Haz mask. Made to be used in the worst environments possible, this IDM can manage a high percentage of Hydrocarbons in any water environment.

Regulator cover in marine-grade Anodized Anticorodal®, light weight, resistant, durable aluminum.  
Reg adjustment knob, internal screw, in AISI 316 stainless steel.  
AISI 316 stainless steel frame and buckles.  
Sensitive reg adjustment knob, sturdy and easy to grab even wearing thick gloves.  
2 NBR straps For a change on the Fly if ever needed.  
1090 g total mask weight (2.40 lb.).  
Heavily reduced positive buoyancy, 172 g (0.40 lb.).  
FVMQ rubber Face Seal, Inhalation Diaphragm, Exhalation Valve to withstand exposure to hydrocarbons,  
Purge button: specific rubber made to withstand exposure to highly contaminated water.  
Cold water certified, balanced, on demand, integrated regulator.  
Polycarbonate visor (siloxane double coated for scratch resistance).  
Directional exhaust valve (4 positions).  
Dive / pre dive switch.  
SAV (SurFace Air Valve) included.

LIMITED LIFETIME WARRANTY

notes
Cannot mount Extender Frame and Kit unless clamping band is switched to nylon: ask when ordering for quote.

Available in Int (yoke) standard or DIN

OCEAN REEF IDMs are CE certified with this, high performance, environmentally sealed and balanced diaphragm first stage with anti-freeze kit.
Adjustable intermediate pressure.
Made of chrome plated brass, with a stainless steel piston and spring, and a Teflon™ seat.
2 high-pressure ports 7/16-20 UNF.
Flow rate of approx. 4800 l/m at 140 bar

SL35TX DIN
Screw connection at 300 bar (4500 Psi).

SL35TX INT
Standard yoke connection 232 bar (3364 Psi).

PRESSURE GAUGE

Single piece brass body; copper beryllium coiled inner mechanism; bourdon tube; rack and pinion movement for smooth and precise operation; tempered glass transparent window; plastic cover with loops for fixing; graduation 350 BAR/5000 PSI, full scale.
Available in: 120CM /48” hose, Yellow.

**OCTOPUS - SECONDARY REGULATOR**

This backup second stage is balanced, has a dive pre-dive switch, comes with a male quick disconnect part, a 120cm/48” QD ExtraFlex Yellow hose. Every IDM diver, especially if diving with QDs or Buddies with QDs should have the option, if needed to bail out with secondary conventional second stage, or QD hard connection.

CUSTOMIZE AND ADD ACCESSORIES TO YOUR MASK!

watch the video

CHECK THIS VIDEO OUT FOR SOME IDEAS
The perfect addition to your G.diver's basic model IDM, or any other OCEAN REEF Full Face scuba masks from 2006 on (with nylon clamping band).
This kit is available in 7 different colors.
Each kit includes:

1. **Frame**: Frames are an extra protection for your head, an aesthetic finishing to your mask, a customization to better identify the diver and a wide surface to add anything you can think of. On the top there is a flat surface, perfect to add any GoPro-like sport camera.

2. **New NACS**, or Neptune Adjustable Communication Support is a Patented OCEAN REEF accessory used to mount your OCEAN REEF communication device to your IDM. It’s light, sturdy and durable. It distributes the weight of the comm unit perfectly on the mask, you don’t feel it anymore.

3. **Earphone Supports**: not only these can be used in case you have a GSM G-Power SL communication unit (you can install the earphones on them), you can also drill holes in the pre-defined points and install side lights. These supports also rotate at a 30° angle, the same support can also be used for sport cameras for an on-board view point!

### Camera & Torch Support

Holds anything cylindrical up to about 70mm (2.7 inch) in diameter with re-openable, heavy duty zip ties. Slide comes off when needed for handling – snaps in easily and holds in place. Adds the possibility for horizontal tilt angle (adding to the 30° vertical of the accessory support). Compatible with standard GoPro fitting.

### Foldable NACS

New NACS, or Neptune Adjustable Communication Support is a Patented OCEAN REEF accessory used to mount your O.R. communication device to your IDM. It’s light, sturdy and durable. It distributes the weight of the comm unit perfectly to the point you don’t even feel it anymore.

This model now features the possibility to fold it inside the mask when storing the IDM.

Compatible with left ear type comm units, such as the GSM G.divers.

**SWIVEL CONNECTION**

The Swivel connection moves freely turning 360° around its axis. It allows free movement of the hose and a streamlined configuration. Chromium plated brass. Can be used with quick disconnect.

**DUAL TANK VALVE**

Allows connection of the second stage directly to two gas sources (mix, side mounting, pony bottle). Allows a diver to alternate between sources without removing the mask. Solid piece of chromium plated brass. Stainless steel cord attaches to safety clip (avoids an unwilling switch of gas). Nice and smooth movement while easy to operate with thick gloves. Can also be used with quick disconnect.

Not available in UK.
OPTICAL LENS SUPPORT 2.0

Compatible with IDM’s M/L and FFSMs Aria, Aria QR+, UNO (sizes ranging from S/M to L/XL, XS excluded), Sea Vu Dry S/M - L/XL, Easybreath S/M - M/L - L/XL, Tusa Sport S/M to L/XL. Lens correction for your IDM and FFSM without ruining your mask.

Use them as convenient glasses on land - snap the legs off and put the frame in your mask when you scuba dive or snorkel for an optical corrected mask!

This product is part of our living eco line - 100% plant based plastic.
LENSES

Single prescription lenses for our Optical lens 2.0 support are available in 7 different corrections per eye.

OPTICAL LENS POINT OF SALE

We also have a Point of Sale that includes 28 lenses.

MAGENTA COLOR ENHANCING LENSES

Magenta lenses are made to enhance your uw vision. Because the water absorbs much of the wavelength of sunlight, colors might look less intense, dull, or different from what they really are. These lenses, that can be installed on your Optical Lens 2.0, will correct the water filtering and make you enjoy the reef’s amazing color.
COMMUNICATION UNITS
THE MOST COMPLETE UNDERWATER WIRELESS UNIT ON THE MARKET

This unit is blending four different OCEAN REEF units into one: the extended range of the Gpower, the like-stereo sound of the GSM G.power SL, the clearness and double channel option of the DC and the battery life of the Gdivers.

Key Features:
• It’s foldable inside the mask. Now you don’t need to assemble the comm unit and take it off the mask. Simply fold it close and pack the IDM.
• Brand new rechargeable, changeable battery with an autonomy of approximately 30 hours. No need to purchase disposable batteries to throw away once they are done. No need to purchase batteries before a dive trip. Recharge with a standard micro USB cable from any power source you want.
• Digital as the first ever unit we introduced in the market – the DC. This one adds clearer communication, with a higher volume AND 2 earphones for a stereo-like experience.
• Double channel unit for separate teams/conversations, depending on the surrounding environment conditions, it exceeds a range of 800ft/250 meters.
• DAT (Digital Activation Transmission) – hands-Free mode.
• Compatible with all prior OCEAN REEF units and competitor units on same Frequency.
• Easy and solid new PTT button. Button module doesn’t create entanglement and can be operated via a flat, sturdy button and easy lever. As intuitive as you would want it.
• Voice menu that is clear and immediate to learn, matches perfectly the simplicity of the buttons.
• 3 level volume.

</thead>
<tbody>
<tr>
<td>GSM CUBE3</td>
<td>OR033131</td>
<td>764500000686</td>
</tr>
</tbody>
</table>

GSM CUBE3

The most versatile unit possible.
- Capable of communicating in three different ways: wireless, hard wired, VHF.
- It can be connected to the ALPHA PRO X DIVERS surface unit for cable hardwired communication – full duplex, hands free communication.
- The unit is a permanent wireless unit. Always on receiving mode for any communication on channel 1 frequency when battery inserted.
- PTT button activates wireless transmission on channel 1 when battery inserted.
- Six-pin waterproof connection allows connecting and detaching from cable communication while underwater.
- GSM CUBE3 can be connected to a separate unit in order to interface with a VHF radio and allow radio communication while on the surface.
GSM G.DIVERS

Wireless underwater transceiver unit, with the autonomy of approx. 30 hours in receiving mode, and range of operation of 200-250 meters (calm sea water). Lightweight, powerful single channel and “push to talk” communication system make the GSM Gdivers the perfect addition to any training class or guided tour, for extra safety and for fun!

The unit operates on the same frequency as all other OCEAN REEF units and most popular wireless communication units on the market. The GSM Gdivers uses a 9V alkaline battery and has a “low battery” alarm which beeps every 30 seconds when the battery is low.

Damper (For use in pools to reduce reverbs); code OR023006.

</tbody>
</table>
M101A

The M101A G.divers is a receive-only unit operating on one channel. The M101A fits on any conventional mask strap or Full Face mask models. It might be held and shared by more divers thanks to the high quality speaker. The M101A uses a 9V alkaline battery and has a "low battery" alarm which beeps every 30 seconds when the battery is low. It’s the perfect instrument for Instructors and team leaders to communicate with divers that don’t wear IDMs with the possibility of integrating a transceiver unit.

M105 Digital DC

Surface operator can easily change from one channel to the other by pressing a button, distinguishing two different lines of communication if needed.

Surface to diver unit.
• Transceiver unit.
• Allows communication with any number of divers wearing wireless comm units.
• Direct communication with PTT walkie-talkie.
• Uses 6V DC lead battery. Allows up to 48 hours of operation.
• Can be powered with a 12V DC source.
• Activated only when the antenna is connected to the unit to prevent unwanted loss of power.
• 10mt (approx. 33ft.) transducer cable length. Available in different lengths on request.
Long cables may require amplifier mounting.
• Has the addition of a second transceiver channel

Comes with:
• Headphone connection.
• Volume control.
• Speaker.
• Water resistant case pressure compensation valve.
• Battery changer.
• Easy to read LED battery tester which shows the power status of the battery.
• Transducer cable.
• Bag.
• Microphone.

Available accessories:
• Audio out cable. (code 8590).
• Headset. (code 8589).
• Tuner for >50 meters M105 Antenna. (code OR008609).
• Splitter for connecting 2 antennas with M105 or M105DC. (code OR023001).
• External power cable code 8594
The M100 G.divers is a portable surface transceiver unit that may be worn on the operator's belt. This is a high performance, compact, and easy to use unit. It is made to respond to the demands of communicating with divers in action without carrying expensive, complicated and heavy units. The size of the main unit is similar to a smartphone / mobile.

The main unit has a PTT (Push to Talk) button and a headphone/microphone connector. The unit turns on when the headphone/microphone is connected to the main unit. The unit turns off automatically when the headphone/microphone is removed. A 10 meter (33 feet) transducer cable connects to the main unit and is lowered into the water. The operator may control the depth of the transducer.

It operates on one channel and uses a 9V replaceable alkaline battery with autonomy of approximately 30 hours. The range of operation is approx 200 meters (600 feet).

The unit comes with the following items:
• 10 meter (33 feet) transducer cable
• Headphone/microphone
• Screwdriver

**ALPHA PRO X DIVERS**

INCLUDES: UW UNIT + SURFACE UNIT + PROFESSIONAL 50 M CABLE

This communication unit is specifically designed to meet the needs of professional and commercial divers that cannot compromise on a full duplex, hands free, super clear communication system. Cable communication is still unequaled in quality, while needing a hard connection diver to surface.

**UNDERWATER UNIT**

- This unit can be sold separately, but is designed to be used specifically with the ALPHA PRO X DIVERS SURFACE UNIT.
- The unit itself is a hardwired comm. unit.
- Clarity of communication is outstanding.
- Range depends on cable length.
- Includes recall button.
- Speaker and microphone as featured in all comm. units.

**SURFACE UNIT**

- Hardwired, full duplex surface unit for underwater communications.
- 2 ports for 2 communication cables.
- On/off and volume adjustment switches.
- Microphone.
- Switch for communication between surface & diver 1, surface & diver 2, surface & diver 1 & diver 2.
- Headset port (headset optional).
- External 12v power port (cable optional).
- Battery charger port.
- Audio/video recall.
- Incorporated speaker.
- 12V rechargeable battery.
- Underwater unit volume adjustment (for both divers).
- Stand-by autonomy: 24h.
**ALPHA PRO X DIVERS BAG**

This bag is designed to be incredibly tough to carry coil cables, it is bright colored and easy to spot. The drawstring top prevents items from falling out but comfortably leaving the cable coiled and connected to a surface unit. Conveniently comes with a handle and shoulder strap.

GAMMA 105

This is an audio/video surface unit. Integrates wireless audio and hardwired video.
- Ultrasonic surface communication unit: 10 m (33 ft) transducer cable, microphone, external power supply cable, audio port, headphone port, volume control, and loudspeaker.
- 7 inch 16:9 color LCD monitor, speaker, audio and video port, brightness and color controls.
- Video port for external video recorder or monitor.
- 12V battery.
- Battery charger connector.
- 12V battery charger.
- CCD Micro Video Camera with underwater housing and mounting bracket. Also sold separately.
- 50 m (165 ft) camera cable. Available length on request.
GAMMA ALPHA

- The Gamma Alpha is similar to the Gamma 105, but where the latter integrates a wireless M105 unit and video, the first integrates Alpha Pro X divers hardwired communication with video.
- Gamma Alpha can receive audio and video from two divers.
- 7 inch 16:9 color LCD monitor; brightness and color controls.
- On/Off and speaker volume adjustment switch.
- Speaker.
- Microphone.
- Switch for communication between surface & diver 1, surface & diver 2, surface & diver 1 & diver 2.
- Headset port (headset optional).
- Audio/video recall from divers.
- 12V rechargeable battery + battery charger.
- 2 plugs for audio connections to divers.
- 2 plugs for video connection to two divers.
- 3 video out plugs.
- Underwater unit volume adjustment (for both divers).
- Switch for the video: 2 positions to show the video of diver 1 or diver 2.
- External power charger, 12V (cable optional).
- Stand-by autonomy: 24h.
- 1 professional surface/diver cable (50 meters, 165 ft. long) (can be sold separately). (code OR033134)
- 1 underwater unit (alpha pro x divers uw unit) (can be sold separately). (code OR033135)
- 1 video cable (50 mt, 165 ft. long) (can be sold separately). (code OR008575)
- 1 CCD micro video camera (can be sold separately). (code OR008573 NTSC; code OR008574 PAL).
PORTABLE AIR CONTROL MODULE

• Lightweight, portable control box for surface air supply + communication (if requested) operations.
• If communication is requested, a ALPHA PRO X DIVERS unit is installed into the ACM (underwater units not included) permitting full duplex with max 2 divers. Cables will then run down with surface air supply cables.
• Depth Gauge/Pneumo Systems: Dual reading gauges continuously monitoring the diver’s depths from 0-40m (0-130ft). Maximum recommended user depth: 40m, 130ft FSW.
• Depth Monitoring/Pneumo Knob is used to meter the flow of air used for depth measurement.
• The Stainless Steel Air Outlets fittings connect the diver’s air supply hose to the ACM, providing a strong, reliable, corrosion resistant connection. Shut-off valves allow the isolation of one diver’s air supply from the other.
• Regulator Adjustment Knob controls the air pressure delivered to the diver’s umbilical. Variable pressure settings are obtainable.
• Selector Valve Handle is used to choose either one of the air supply cylinders. Individual cylinders may be changed out without interrupting the dive.
• High Pressure (HP) Supply Gauges directly monitor the pressure in each of the air supply cylinders.

### BASIC LEVEL 2
Tools required for servicing the IDM masks.

### OCEAN REEF LUXURY TOOL KIT
Tools needed for servicing the IDM masks.

### NOZZLE ADJUSTMENT TOOL
For every Ocean Reef Service Center - used to adjust the 2nd stage according to factory specs IDM.

### NEPTUNE SPACE REGULATOR ADAPTER
For technicians who set up and check Space mask regulators prior to mask assembly.

### NEPTUNE III REGULATOR ADAPTER
For technicians who set up and check Neptune III mask regulators prior to mask assembly.

### PORTABLE TEST BENCH
Portable test bench for OCEAN REEF IDM and conventional regulators.

### MIXER
This accessory allows for the connection between the M105 Digital/M105 Digital DC and an external amplifier or recorder. The Mixer takes its power directly from the M105 and does not need a separate battery. Audio output cables are not included.

### IN ADDITION - OUR CUSTOM SERVICES

#### BROADCASTING/ CONFERENCE CALL
Custom made systems for underwater live broadcasting, conference calls, audio & video, one way or 2-way communication (i.e. Skype calls!). Excellent for education, TV, shows, presentations, exploration etc.

#### AQUARIUM AND SHOWS INSTALLATIONS
Custom made systems for wireless/hardwire communication between submerged personnel/ surface/ other: Connection to Facility amplification For public interaction (i.e. Scripps Aquarium).
